✓ ~~METHODS FOR MAKING AND USING A THERMOPHILIC ENZYME AS A  $\beta$ -GLYCOSIDASE--~~

*In The Claims:*

---

14. (Amended) A method for using a thermophilic enzyme as a  $\beta$ -glycosidase, comprising the following steps:

(a) providing an enzyme, wherein the enzyme comprises a sequence as set forth in SEQ ID NO:2 and the enzyme comprises four subunits to form a tetramer, wherein each subunit of the tetramer comprises a sequence as set forth in SEQ ID NO:2; and

(b) contacting the tetrameric enzyme with a substrate under conditions wherein the enzyme functions as a  $\beta$ -glycosidase on the substrate.

D<sup>1</sup> 15. (Amended) The method of claim 14, wherein the function comprises hydrolysis of a  $\beta$ -glucoside, wherein the  $\beta$ -glucoside comprises a long alkyl chain.

16. (Amended) The method of claim 15, wherein the long alkyl chain comprises 8 or more carbon atoms.

17. (Amended) The method of claim 14, wherein the enzyme has a high affinity to a  $\beta$ -glucoside comprising a long alkyl chain.

---

D<sup>2</sup> 20. (Amended) The method of claim 14, wherein the conditions comprise temperatures selected from the group consisting of 90°C or higher and 100°C or higher.

---
